

Anti-LY96 Rabbit Polyclonal Antibody

Cat:AC51791

Basic information

Source: Rabbit

Species reactivity: Human Mouse

Isotype: IgG

Purification: Affinity purification

MW(kDa):19kDa

Background:

This gene encodes a protein which associates with toll-like receptor 4 on the cell surface and confers responsiveness to lipopolysaccharide (LPS), thus providing a link between the receptor and LPS signaling. Studies of the mouse ortholog suggest that this gene may be involved in endotoxin neutralization. Alternative splicing results in multiple transcript variants encoding different isoforms.

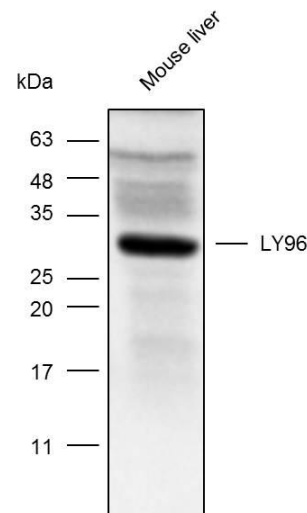

Swiss Prot:Q9Y6Y9

Gene ID:23643

Tested applications: WB

Immunogen:Recombinant protein of human LY96

Storage: Store at -20°C. Avoid freeze / thaw cycles.
Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
