

Anti-SQSTM1 Rabbit Polyclonal Antibody

Cat:AC51149

Basic information

Source: Rabbit

Species reactivity: Human

Isotype: IgG

Purification: Affinity purification

MW(kDa):63kDa

Background:

This gene encodes a multifunctional protein that binds ubiquitin and regulates activation of the nuclear factor kappa-B (NF- κ B) signaling pathway. The protein functions as a scaffolding/adaptor protein in concert with TNF receptor-associated factor 6 to mediate activation of NF- κ B in response to upstream signals. Alternatively spliced transcript variants encoding either the same or different isoforms have been identified for this gene. Mutations in this gene result in sporadic and familial Paget disease of bone.

Swiss Prot: Q13501

Gene ID: 8878

Tested applications: WB IHC

Immunogen:Recombinant protein of human SQSTM1

Storage: Store at -20°C . Avoid freeze / thaw cycles.
Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Western blot analysis with Anti-SQSTM1 Rabbit Polyclonal Antibody diluted at 1:1,000

Immunohistochemistry of paraffin-embedded Pancreatic cancer(hu) using Anti-SQSTM1 Rabbit Polyclonal Antibody at dilution of 1:100 (100x lens).
